•linkedin.com/in/zehragulbuyukarslan •Karabük/Türkiye

PROFILE

A multi-disciplinary professional combining expertise in AI development, data analytics, and project management to build smart, user-centered solutions that improve people’s daily lives. Experienced in leading short-term development projects, managing datasets, and collaborating across diverse teams. Always seeking to contribute meaningfully through technology.

EDUCATION

Karabuk University

B.Sc. in Computer Engineering (Oct 2023 - Jul 2027)

University of Lodz

Computer Science Erasmus+ (Summer Semester 2025)

EXPERIENCE

Data Analyst at Karabuk University Information Technology Directorate

Part-Time, On-site | Oct 2024 – Present

Performed data collection, organization, and cleaning for an AI chatbot project. Trained the system by creating user scenarios and sample dialogues. Helped improve the accuracy of responses to Frequently Asked Questions (FAQs). Currently developing RAG integration to ensure data freshness.

Prompt Engineer Intern at M8D6

Full-Time, On-site | Aug 2025 – Dec 2025

Researched, designed, and tested prompt engineering techniques that prompt, the program aims to enhance how LLM systems are applied in business intelligence, automation, and customer interaction—particularly within the “Smart Dispatch” system in the U.S. Home Services sector.

Software Developer at Deep Dive Dynamics

Full-Time, Hybrid | Sep 2024 – Aug 2025

Developed motion control and mission automation systems for autonomous designed and implemented computer vision pipelines. Utilized Python and C++ with Pixhawk, PyMAVLink, and ROS. Implemented PID-based control algorithms for precise motion handling. Integrated embedded systems and sensors.

PROJECTS

Autonomous Email Filtering System

Built a Python-based automation system to streamline inbox hygiene through keyword-specific filtering and purging via the IMAP protocol. Orchestrated a fully autonomous workflow using GitHub Actions and YAML to execute daily maintenance tasks, incorporating UTF-8 search support and structured error logging for high reliability.

ArbiFi | AI Dispute Resolution

Developed a decentralized mediation platform for DAOs and freelancers using Next.js, TypeScript, and Prisma. Engineered an AI logic layer to automate evidence analysis and generate human-readable decisions, while leveraging Solana to secure final outcomes on-chain for transparent, trustless execution.

CERTIFICATIONS & AWARDS

- Version Control: Git & GitHub – BTK Akademi 2024
- Programming in C – BTK Akademi 2024
- TÜBİTAK Project Management Training 2024
- International Project Cycle Training – Karabuk Municipality 2023
- Blockchain Workshop – My2Cents 2022
- Diploma of Dan (Black Belt) – WKF 2020

Sosyalfest Ideathon 2nd Place Award 2025 — InoGen

SKILLS

Programming Languages: Python, C, C#

Tools: Git, GitHub, VS Code, Jupyter

Concepts: OOP, Prompt Engineering, Machine Learning Basics

Soft Skills: Project Management, Teamwork, Communication, Problem Solving

LANGUAGES

Turkish: C2 (Native)	English: C1 (Advanced)	German: A2 (Basic)
-------------------------	---------------------------	-----------------------

VOLUNTEERING

Committee Member at IEEE Karabuk Computer Society

Organized career development workshops focused on CV building and interview coaching.
