

ZEHRA GÜL BÜYÜKARSLAN

Computer Engineering Senior Student
AI / Web3 Full-Stack Engineer | Project Management

PROFILE

Email: zgbuyukarslan@icloud.com
GitHub: github.com/zehragulbuyukarslan
LinkedIn: linkedin.com/in/zehragulbuyukarslan
Medium: medium.com/@zehragulbuyukarslan
Location: Istanbul, Turkey

My goal is to improve people's lives by developing smart, user-centered solutions through technology. I have experience leading short-term development projects, managing datasets, and collaborating with multidisciplinary teams.

EDUCATION

Karabuk University
B.Sc. in Computer Engineering (Oct 2023 - Jul 2027)
University of Lodz
Computer Science Erasmus+ (Summer Semester 2025)

EXPERIENCE

Data Analyst at Karabuk University Information Technology Directorate
Part-Time, On-site | Oct 2024 – Oct 2026
Performed data collection, organization, and cleaning for an AI chatbot project. Trained the system by creating user scenarios and sample dialogues. Helped improve the accuracy of responses to Frequently Asked Questions (FAQs). Developed RAG integration to ensure data freshness.

Prompt Engineer Intern, AI Startup (U.S.-based)
Full-Time, On-site | Aug 2025 – Dec 2025
Researched, designed, and tested prompt engineering techniques aimed at enhancing how LLM systems are applied in business intelligence, automation, and customer interaction, particularly within a "Smart Dispatch" system in the U.S. Home Services sector.

Software Developer at Deep Dive Dynamics
Full-Time, Hybrid | Sep 2024 – Aug 2025
Developed motion control and mission automation systems for autonomous designed and implemented computer vision pipelines. Utilized Python and C++ with Pixhawk, PyMAVLink, and ROS. Implemented PID-based control algorithms for precise motion handling. Integrated embedded systems and sensors.

SKILLS

Programming Languages: Python, C, C#, JAVA, Solidity
Tools: Git, GitHub, VS Code, Jupyter, Foundry
Concepts: OOP, Prompt Engineering, ML Basics, Smart Contracts
Soft Skills: Teamwork, Communication, Problem Solving
Languages: Turkish: C2 (Native), English: C1 (Advanced), German: A2 (Basic)

PROJECTS

RWA Home Tokenization Platform | Blockchain Capstone
[GitHub Link \(BuilderMare Summer Bootcamp 2026\)](#)
Designed and deployed a real-world-asset (RWA) tokenization system for residential property with distinct landlord, buyer, and tenant roles. Built and tested Solidity smart contracts with Foundry, deployed to the Arc Testnet, and built a Vite + TypeScript frontend using viem for contract interaction — the capstone project of an intensive blockchain development bootcamp (Solidity → Arc → dApp).

Autonomous Email Filtering System
[GitHub Link](#)
Built a Python-based automation system to streamline inbox hygiene through keyword-specific filtering and purging via the IMAP protocol. Orchestrated a fully autonomous workflow using GitHub Actions and YAML to execute daily maintenance tasks, incorporating UTF-8 search support and structured error logging for high reliability.

ArbiFi | AI Dispute Resolution
Developed a decentralized mediation platform for DAOs and freelancers using Next.js, TypeScript, and Prisma. Engineered an AI layer to automate evidence analysis and generate human-readable decisions, leveraging Solana to secure outcomes on-chain.

MonadStamp | Physical Event Check-in dApp
[Demo Link](#) | [GitHub Link](#)
Developed a dApp on the Monad Testnet that uses an ERC-721-based SBT and an EIP-712 gasless relay architecture. Bypassed the eth_newFilter restriction of the Monad RPC using chunked getLogs polling. Designed a mobile-first interface using React, Vite, and Tailwind CSS; the project was completed in one day at the Monad Blitz Ankara Hackathon.

AWARDS & CERTIFICATIONS

Blockchain Development Bootcamp — BuilderMare, 2026
TÜBİTAK 2209-A Undergraduate Research Project Grant — 2026
Sosyalfest Ideathon 2nd Place Award — InoGen 2025
Version Control: Git & GitHub — BTK Akademi 2024
Programming in C — BTK Akademi 2024
TÜBİTAK Project Management Training — 2024
International Project Cycle Training — Karabuk Mun 2023
Blockchain Workshop — My2Cents 2022
Diploma of Dan (Black Belt) — WKF 2020

VOLUNTEERING

Karabuk IEEE CS | Committee Member
Organized career development workshops focused on CV building and interview coaching.
